ASX Announcement **22 January 2018**

Elsight Technology Critical to Protecting US Vice President Mike Pence

Highlights

- **Elsight tech used as standard technology for Israel Police Force**
- **360º-view of surrounding vehicles**
- **Secure, two-way real-time communications strengthens protection**

Tel Aviv — January 21, 2018 —Elsight Limited's (ASX: "ELS") high quality, exceptionally secure continuous, two-way video, voice, and data communications has been field proven by the Israel police and military. On 21st of January, the technology was deployed in the lead and follow police vehicles assigned to protect U.S. Vice President Mike Pence and his team.

Elsight's technology enables real-time decision-making via live video and audio connection from the field to HQ or command centres, which is especially critical when escorting high-level visitors.

Elsight technologies ensure continuous, high quality, two-way audio, video, data transmissions from remote locations, aggregating multiple cellular and/or Wi-Fi links to maximize bandwidth. The system simultaneously transmits 3G/4G LTE/5G and other future technologies, with failover to satellite.

Multichannel encrypted transmission ensures complete security. Data is split into multiple pieces, based on number of channels, and each segment is encrypted up to 256 bits, locked into a VPN tunnel, and transmitted via aggregated GSM channels. Even if one piece of data has been hacked, it's still impossible to get the full picture.

"Elsight technology has already been field-proven in mission-critical situations," said Nir Gabay, Elsight CEO. "Deploying the communications technology needed to protect the US Vice President is just a normal part of our job."

About Elsight

Elsight (www.el-sight.com) is a solution provider of ground-breaking hybrid video and data transport services (on-the-move or fixed) for large Safe-City projects, sensitive facilities management, and surveillance and protective activities. The platform supports video capturing, recording, and highly secured transmission against video interception and hacking. ***Elsight***'s platform was designed to address the most demanding requirements of Special Forces across enemy lines and sophisticated intelligence organizations. These systems underwent the most rigorous testing in combat situations as well as extensive testing by the most demanding laboratories. As a result, they present an unmatched level of reliability, lowest latency, and highest adaptive bandwidth over cellular networks that enables HD and 4K tv transmission quality, with "never-fail" redundancy and much more. For the first time they offer strict military requirements for civil usage. ***Elsight***'s customers range from defence and homeland security, industrial security, broadcasting, first responders and healthcare.
